The new Drilltec indexable insert drill from Boehlerit sets new standards for productivity and cost-effectiveness

Kapfenberg / Styria, 08/01/2019

High cutting and feed speeds for maximum efficiency

Boehlerit, the carbide and tool specialist, is launching a new drilling tool on the market that optimises the production process and increases efficiency. The innovative Drilltec impresses with high cutting and feed speeds, a high metal removal rate and outstanding drilling quality. This reduces process times and significantly increases productivity. With the option of using 4 cutting edges, the Drilltec is extremely economical and guarantees a long tool life and cost-reduced tool utilisation. Thanks to a wide range of available diameters, Boehlerit offers a high level of product diversity. In addition, the Drilltec is suitable for almost any drilling application.

The optimised chip removal channel ensures easy chip transport and thus guarantees a smooth and efficient work process. At the same time, the tool significantly improves surface quality and drilling precision, leading to outstanding machining results. The Drilltec is available in 2xD, 3xD, 4xD and 5xD sizes and therefore offers flexibility for different requirements. Different grades are available for machining steel, cast iron and stainless materials in order to achieve optimum results. *"With our extensive and versatile drilling range, we offer our customers an innovative solution to optimise their production processes and increase their efficiency,"* says Kevin Mesanovic, *Product Manager Turning at Boehlerit.* *"Our focus is on the highest quality, durability and cost-effectiveness."*

Press release

The company

As a carbide pioneer, the Boehlerit Group is one of the world's leading manufacturers of wear protection solutions and cutting tools for machining metal and composite materials. With cutting materials, semi-finished products, precision tools and tool systems for milling, turning, grooving and forming, the family-owned company has been ensuring process reliability and efficiency worldwide since 1932. Around 800 employees offer customers comprehensive know-how in all aspects of metallurgy in order to be able to realise process-optimised manufacturing technologies, the highest quality and an edge in tool productivity. With three production sites in Europe and Asia, international subsidiaries and a network of sales partners, the carbide and tool specialist has a global presence. Together with its two legally independent sister companies Leitz and Bilz, the Boehlerit Group forms the globally active Brucklacher Group, in which over 4,000 employees generate an annual turnover of around 450 million euros.
